SUMMARY

Site Reliability Engineer at NN, working remotely from Greece, alongside a DevOps & Cloud role at VASS. Most of my work is on AWS: migrations, monitoring and compliance at NN; Terraform, Bash and CI/CD at VASS. I started out in cybersecurity (SOC, vulnerability assessments, incident response), so I look at infrastructure with security in mind.

EXPERIENCE

Site Reliability Engineer (DevOps & Cloud)

Oct 2025 – Present

NN (Nationale-Nederlanden) · Netherlands, remote

- Migrate applications and the systems they connect to between AWS environments, mapping dependencies first.
- Part of the team monitoring the bank's systems in CloudWatch; I handle incidents in ServiceNow when they arise.
- Track compliance with internal bank policies through AWS Config, Security Hub, Inspector, SCPs and Azure Policy.
- Maintain and upgrade our CI/CD pipelines in Azure DevOps.
- Keep the services we support up to date with the bank's security standards as they change.

DevOps & Cloud Engineer

May 2023 – Present

VASS

- Work on EU-funded projects built on serverless AWS architectures with AI components, delivering on schedule.
- Write and maintain the AWS infrastructure in Terraform, for both serverless and server-based workloads.
- Build CI/CD pipelines in GitLab CI and Jenkins for automated testing and deployment.
- Write Bash tools and scripts that automate deployments and take manual steps out of routine operations.
- Harden infrastructure and pipelines; found and fixed critical bugs before they became security issues.

Cyber Security Analyst

Sep 2022 – May 2023

Encode (Obrela Security Industries)

- Monitored and investigated security events from firewalls, IDS/IPS and the SIEM, and took part in incident response.
- Analysed phishing, malware and social engineering cases with the help of threat intelligence.
- Ran vulnerability assessments and penetration tests on Windows, Linux and macOS, with Python and Bash scripting.

IT & Security Engineer

Mar 2022 – Aug 2022

Alphaomegazed Ltd.

- Ran vulnerability assessments and incident response for clients, and advised them on ISO 27001/27701.
- Deployed an Open XDR (SIEM/SOAR) platform for a client, connected their sensors to it and trained their staff.

IT Manager (Lieutenant)

Nov 2020 – Jan 2022

Hellenic Army · Computer Science Department

- Ran the department's IT operations and wrote the policies, procedures and manuals for internal IT use.
- Set up and configured the VoIP network across multiple army camps and helped design the wider network.
- Trained and mentored staff and ran their performance reviews.

Earlier roles · E-commerce operations, online sales and technical support

2017 – 2020

SKILLS

Cloud & IaC: AWS, Azure, Terraform, AWS CDK, CloudFormation

CI/CD & Delivery: Azure DevOps, GitLab CI, Jenkins, Docker, Agile

Monitoring & ITSM: CloudWatch, ServiceNow, Jira Service Management

Security & Compliance: AWS Config, Security Hub, Inspector, SCPs, Azure Policy, QRadar SIEM, ISO 27001/27701, vulnerability assessment, penetration testing, incident response

Systems & Scripting: Bash, Python, Linux, Windows, Active Directory, networking, VoIP

Soft skills: Explaining technical problems to non-technical people, leading groups and keeping sessions on track, thinking on my feet when plans change, handling different personalities and settling disagreements, preparing thoroughly

Languages: Greek (native), English (fluent), Spanish (basic)

EDUCATION & CERTIFICATIONS

Education: Computer Engineering, University of Patras, Greece (enrolled 2014)

Certified: AWS Certified Cloud Practitioner, Stellar Cyber Certified Associate

In progress: Studying for AWS Certified CloudOps Engineer – Associate; courses on AI in IT

Interests: Professional Dungeon Master (D&D) on the side, Hiking, Triathlon, All Creative Hobbies

Reading: The Art of War (Sun Tzu), Algorithms to Live By (Brian Christian), Hacking Humans (Christopher Hadnagy), To Have or to Be? (Erich Fromm)
